

Comes complete with "Look Mom...No Cavities!" book and VHS or DVD video.

Anyone who works with children will want this kit!

D101 Oral Education Curriculum Kit

Includes an outline for an 8-month curriculum

Good dental healthcare is a lesson that will last a lifetime. If you work with children in any capacity, this educational kit will be a big hit. Healthcare professionals, dental hygienists and assistants, school nurses, teachers, public healthcare educators and parents can use the materials to help children form good dental health habits. We also recommend the binder for day care centers, after-school programs and health clinics. Also available in Spanish.

School VHS or DVD video available— "Dion goes to the Dentist"

Each binder ordered comes with 50 Oral Care Adventure Booklets. Offer good until 8/05.

Look Mom...No Cavities! book

90-page reference book is easy-to-follow, with question and answer sections, explanatory diagrams, cavity prevention checklists, and food charts. Good reference guide for teachers, parents, school nurses, and public health officials.

Look Mom...No Cavities! VHS/DVD video

A Time Life award winning video. Features a visit to a pediatric dentist office. Dr. George shows a simple, effective program that parents and children can follow at home.

Oral Care Adventure booklet

These colorful booklets contain simple oral health care information and several interactive activities for children Pre-K through second grade to enjoy with oral health care education.

Lesson highlights

- Cavity prevention:** Teach the basics of cavity prevention, the function of teeth, and the types of teeth.
- Tooth decay:** Explain the parts of a tooth and how teeth break down.
- Teeth and bacteria:** Demonstrate the battle between bacteria and teeth with a fun skit.
- Oral health habits:** Provide information on flossing and brushing techniques, and motivate children with The Great Brush Challenge.
- Nutrition:** Tell how different foods impact teeth.
- Careers in dentistry:** Introduce the field of dentistry, dental hygiene and public health with the excitement of a scavenger hunt.

Lots of information...loads of fun

Designed for children ages 5 to 18, the *Look Mom...No Cavities!* education curriculum kit teaches safe and effective ways to maintain good oral healthcare habits.

The *Look Mom...No Cavities!* education curriculum kit contains many informative and entertaining lessons. Each unit starts with background information to prepare you for the instruction and activities. Detailed lesson plans come alive through worksheets, projects and vocabulary development..

The binder also contains ideas to incorporate dental healthcare themes into all parts of a curriculum and a recommended reading list of children/adolescent literature with dental themes. Bulletin board ideas promote visual learning and give children a place to celebrate their oral healthcare accomplishments.
